

MANUAL SIDE BOARDING STAIRS

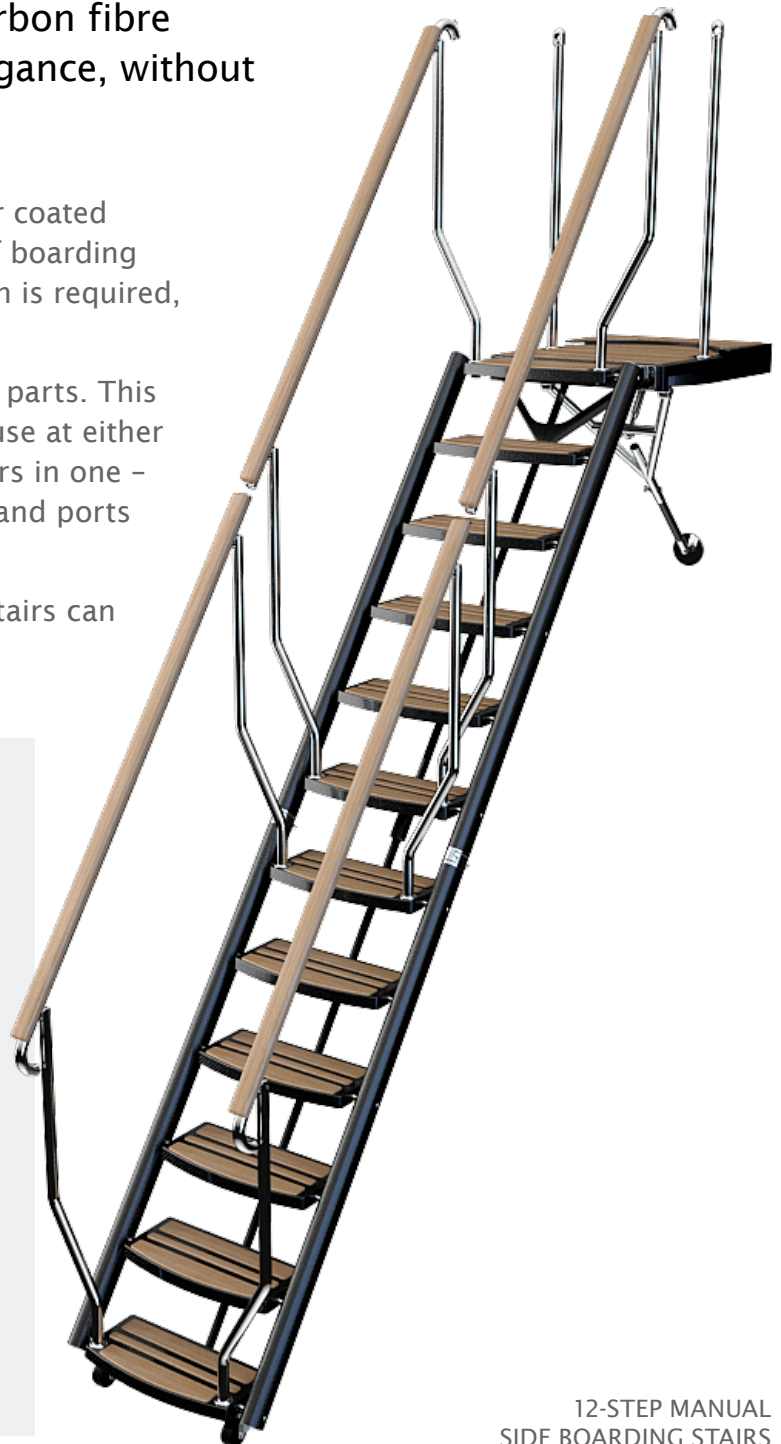

C-Quip's exceptionally lightweight carbon fibre side boarding stairs maximise on elegance, without compromising on strength.

An attractive teak tread design along with clear coated carbon makes these stairs an essential piece of boarding equipment for any yacht. Where a painted finish is required, they can be matched to any colour.

Our longer length models can be split into two parts. This not only allows for easier storage but also for use at either half or full length. They are essentially two stairs in one – ideal for use when changing between marinas and ports with high or low docks.

C-Quip's wide range of Manual Side Boarding Stairs can also be custom made to your specifications.

- **Lightweight for easy deployment. Able to be carried by one crew member**
- **Easy attachment, no tools required**
- **Self levelling steps**
- **0-180 degree slewing top platform available**
- **Available with carbon fibre or polished stainless steel handrails with teak capping**
- **From four to sixteen steps**
- **Can be split into two for long/short option or easier storage**
- **An optional storage bag is available**
